***Response to Amendment***

This is in response to an amendment file on June 2<sup>nd</sup>, 2004 for letter for patent filed on February 8<sup>th</sup>, 2001 in which claims 1-10 were presented for examination. In the amendment, claims 1 have been amended, no claim has been canceled, and no claim have been added. Claims 1-20 are pending in the letter.

***Response to Arguments***

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hurwitz et al (U.S. Patent No 6,748,366).

4. As per claims 1-20, Hurwitz et al teaches a merchandise transaction method on online shopping an online shopping system comprising a first step in which an intermediary receives information about an electronic mail keeper to which a user desires transaction, information

Art Unit: 3621

about commodities to be purchased by the user and a packet an executes an order and payment of commodities to an electronic mail keeper in behalf of the user and second step in which the intermediary receives a secret decryption key for the packet transmitted from the user in exchange of the commodities and then obtains a credit card number of the user by the deciphering the packet cipher.... (see figs 1, 2, column 2 line 49 to 5 lines 25)
